

Data Visualizations

As data becomes more influential in everyday business decisions, new ways are required to analyze and comprehend this information. Data Visualizations allow us to do just that by communicating information clearly and quickly through the use of maps, graphs, and charts. International Mapping specializes in the creation of Data Visualizations. We help Government and non-Government Agencies turn complex data sets into graphically pleasing and eye opening visualizations, drawing attention to key patterns and observations.

SERVICES

- Data Analysis
- Planning & Storyboarding
- Interactive Visualizations
- Static Visualizations

"Alex Tait and his team at International Mapping provide innovative solutions that address the thorny challenges inherent in presenting geographical and other data-intensive information in a compelling and highly usable way. They understand that elegant, thoughtful design serves an enormously powerful role in conveying complex information in an elegant fashion. The firm's technical and design expertise is combined with consistently responsive customer service and a high degree of professionalism."
